Blue Eyeball 2.0 USB Webcam

A sleek design in a very portable package, the [Eyeball 2.0 Webcam](#) features high-definition audio and video (2 megapixel camera) to give you a better Web chat experience. The 2.0 version features a retractable camera lens for privacy when you don't want to be seen, and a special monitor adapter lets you position the camera on top of almost any monitor. The best part? Driverless installation, with no CDs or long wait to get up and running.
